Cullah,

Thanks for your patience here. Can you let me know more about what you would need for the 14th - size of room, timing, structure of the event, etc.

For the DNC event, Aug 21 will work.

Thanks,

Gabby

Hey Gabby,

Just following up on 1871's plans during the DNC. Would August 21st or 20th be good dates to do events there? Would love to confirm to get some plans in motion. I know you mentioned you were asking to see if you guys already had plans during that week.

Also, would September 14th be available to do an Intersect Constitutional Workshop? Just a day of workshopping with the Cardano community that is putting together their governance constitution on-chain. Interesting stuff! Would be useful for us in building our own Chicago web3 governance.

Thanks,  
Cullah

Monday is open for me. Happy to get on a virtual call.

Will get an additional one using your calendar for the other items.

Cheers,  
Cullah

What's your availability next week on Monday to meet with [redacted]?

Let's grab some time to chat further on the DNC event and governance workshops! Here is a link to my calendar.

Thanks,  
Gabby

Hey Gabby,

It was awesome to see the Farcaster event as part of "Unofficial ETHChicago Week". We had 4 different events that week! We're super grateful for all your help with that. Is there a repository for where we can access the recordings?

Happy to connect to [redacted] and where else needed. Looking forward to some summer events and for working together more for the Web3 Innovation Summit and the next conference.

For August, ETHChicago is a partner in putting on "CryptoDNC" during the DNC in Chicago. Is 1871 already doing anything during the DNC from Aug 18-22? Could we put August 20th for a panel and/or keynote speaker event in the auditorium? Excited to get some impactful conversations around crypto policy during that convention week. It's a very hot button issue.

Additionally, there is an opportunity for ETHChicago to run Governance workshops over the coming months via my involvement in [Cardano's Intersect](#). The goal would be to hold a workshop and/or discussion at 1871 to prompt ETHChicago organization to come up with our own DAO government structure and launch it for the whole city to participate in. This is partly inspired by the morning keynote speaker from the last Web3 Innovation Summit at 1871! I will update everyone with more information when I get it.

Cheers,  
Cullah
